SECTION 4 – FIRST AID MEASURES		
Inhalation	Remove victim to fresh air away from exposure. Obtain medical attention if symptoms occur.	
Skin contact	Immediately wash contaminated skin with plenty of soap and water. Remove contaminated	
	clothing and wash before re-use. Seek medical advice (e.g. doctor) if irritation, burning or redness persists.	
Eye contact	If in eyes, hold eyelids apart and flush the eyes continuously with running water. Remove	
	contact lenses. Continue flushing until advised to stop by the Poisons Information Centre or a	
	doctor, or for at least 15 minutes. Immediately call a POISON CENTER or doctor/physician.	
Ingestion	Do NOT induce vomiting. Do NOT attempt to give anything by mouth to an unconscious person.	
	Rinse mouth thoroughly with water immediately. Give water to drink. If vomiting occurs, give	
	further water to achieve effective dilution. Seek medical advice (e.g. doctor).	
Advice to Doctor	Treat symptomatically.	
Scheduled Poisons	Poisons Information Centre in each Australian State capital city or in Christchurch, New Zealand	
	can provide additional assistance for scheduled poisons. (Phone Australia 131126 or New	
	Zealand 0800 764 766).	
First Aid Facilities	Eye wash station. Normal washroom facilities.	

SECTION 5 – FIRE FIGHTING MEASURES		
Fire and Explosion Hazards	Non flammable liquid. However, on evaporation of the aqueous component, the residual material may burn.	
Extinguishing Media	Use an extinguishing media suitable for surrounding fires. Use carbon dioxide (CO2) fire extinguisher, water fog or alcohol resistant foam or fine water spray.	
Fire Fighting	Keep containers exposed to extreme heat cool with water spray. Fire fighters to wear self-contained breathing apparatus if risk of exposure to products of combustion or decomposition.	
Flash Point	None

SECTION 6 – ACCIDENTAL RELEASE MEASURES		
Emergency Procedures	Minor spills do not normally need any special clean-up measures – rinse with water.	
	In the event of a major spill, prevent spillage from entering drains or water courses. Wear	
	appropriate personal protective equipment and clothing to prevent exposure. Increase	
	ventilation. As a water based product, if spilt on electrical equipment the product will cause	
	short-circuits. If possible contain the spill. Place inert absorbent material onto spillage. Collect	
	the material and place into a suitable labelled container. Dispose of waste according to the	
	applicable local and national regulations. If contamination of sewers or waterways occurs	
	inform the local water and waste management authorities in accordance with local	
	regulations.	

SECTION 7 – HANDLING AND STORAGE		
Handling	Avoid skin or eye contact with concentrate. Wear protective clothing when risk of exposure occurs. Avoid contact with incompatible materials. When handling, DO NOT eat, drink or smoke. Keep containers closed at all times. Avoid physical damage to containers. Always wash hands with soap and water after handling. Work clothes should be laundered. Launder contaminated clothing before re-use.	
Storage	Store in a cool, dry, well-ventilated area, out of direct sunlight. Protect from freezing. Store in suitable, labelled containers. Keep containers tightly closed. Store away from incompatible materials. Ensure that storage conditions comply with applicable local and national regulations.	

SECTION 8 – EXPOSURE	CONTROLS AND PERSONAL PROTECTION
Exposure Limits	National Occupational Exposure Limits, as published by National Occupational Health & Safety Commission: Time-weighted Average (TWA): None established for product. Propylene glycol monomethyl ether: 100ppm, 369 mg/m3 Short Term Exposure Limit (STEL): None established for product. Propylene glycol monomethyl ether: 150 ppm, 553 mg/m3
Ventilation	Use with adequate ventilation.
Personal Protective Equipment	Use good occupational work practice. The use of protective clothing and equipment depends upon the degree and nature of exposure. The following protective equipment should be available;
Eye Protection	Safety glasses with full face shield should be used for handling concentrate in quantity, cleaning up spills, decanting, etc. Eye protection devices should conform to relevant regulations. Eye protection should conform with Australian/New Zealand Standard AS/NZS 1337 - Eye Protectors for Industrial Applications.
Hand Protection	Wear gloves of impervious material such as butyl rubber, natural latex, neoprene, PVC and nitrile – to handle in quantity, clean up spills, decanting, etc. Final choice of appropriate gloves will vary according to individual circumstances. i.e. methods of handling or according to risk assessments undertaken. Occupational protective gloves should conform to relevant regulations. Reference should be made to AS/NZS 2161.1: Occupational protective gloves - Selection, use and maintenance.

Body Protection	Suitable protective workwear, e.g. rubber or plastic apron, sleeves, boots and cotton overalls buttoned at neck and wrist are recommended. Chemical resistant apron is recommended where large quantities are handled.
Respirator	Generally not required for typical applications with diluted solutions as per label directions. Not required for normal cleaning operations with adequate ventilation. Where high contaminant spray mist or vapour levels exist, ie, approaching the exposure limit, the following additional equipment is required: For short elevated exposures, eg, spillages:-Appropriate organic vapour cartridge respirator as per the requirements of AS/NZS 1715 and AS/NZS 1716 (Respiratory protective devices). For prolonged exposure and confined spaces:- full face air supplied or self contained breathing apparatus (if vapour levels exceed the Exposure Limit by more than ten times, air supplied apparatus should be used).
